

Seven Genocide Questions Turks in Denial Have Trouble Answering

1. Why do Turks portray the Armenian genocide as just a WWI event when massacres of indigenous Armenians have occurred for centuries since 1064?
2. Why were Assyrians and Greeks, and Armenian conscripts, women, children and the elderly all murdered if this was about so-called Armenian 'traitors'?
3. Why were 2,549 Armenian religious sites destroyed and Armenian place names obliterated, even decades after the war?
4. Why was Armenian blood money property – stolen after their owners were murdered – not returned to descendants or the church after WWI?
5. Why aren't Turks allowed to research and discuss their genocide history without fear of being imprisoned under Turkish Penal Codes?
6. Why do 29 nations, including Ottoman Turk Allies Austria and Germany, confirm that the Ottoman Turks committed genocide?
7. Why would anyone believe corrupt politicians (afraid of saying sorry and paying reparations), instead of courageous Turkish academics, who tell the truth about the racist extermination of Christians and their cultures during the Armenian, Assyrian and Greek genocides?
