The Western world did nothing to stop the barbaric acts of Ottoman Turks and Kurds when committing the genocide of millions of Armenian, Assyrian and Greek Christians a century ago. The USA and UK don't even recognise this crime against humanity as genocide because they court Turkey as a so-called 'ally'! Emboldened by the West's inaction and naivety, now the same inhumanity is being perpetrated by Islamic terror groups seeking to impose Sharia Law and change our way of life in the modern world.

When will the civilized world wake up and realise that our freedoms and faith are in danger across the world – from a religion that condones such brutal acts as female genital mutilation and 'honour' killing, beheading, stoning, and treats females as less important than males, and which has no tolerance for other faiths, nor any control over the poisonous messages given by some Islamic leaders?

It's time for Islam to stop its radicalism, embrace the modern world and respect others, or the civilized world will have to fight for its very existence. Recognise the brutality of the Christian genocides; recognise the danger we're in today! http://originsdiscovery.com
