- 🔴 Turkish propaganda tries to falsely portray the Armenian Genocide as a response to Armenian 'uprisings' or the threat of Russia during WWI.
- 🔴 None of these untrue 'excuses' are justification for the extermination of an unarmed civilian minority by their own government – these are war crimes.
- 🔴 But when did the Armenian Genocide start? On 24 April 1915 when more than 250 Armenian leaders from Constantinople were killed?
- 🔴 The Genocide of Armenians started in 1064, when Alp Arslan's Seljuk Turks invaded, destroying the Armenian capital Ani and slaughtering its people.
- 🔴 Since then, successive massacres have reduced indigenous Christians from a majority before invasion to 20% in 1915, and to less than 1% today.
- 🔴 Thus, the genocidal events of 1915 were just the end game against Armenian, Assyrian and Greek Christians that has lasted 951 years.
- 🔴 WWI was just a cover for Turks, so Christian property could be stolen and Turkey could become entirely Muslim – the 'final solution' plan succeeded.
- 🔴 Today, the USA, UK, Australia and NZ recognise crimes against humanity like Srebrenica, but are shamefully blind to Turk genocides – to appease Turkey.
- 🔴 Today, Turks who deny the history of invasion, subjugation and genocide that Turkey is built on victimize and denigrate the memory of those murdered.
- 🔴 Today, reports suggest Turkey is covertly supporting the evil IS – even against its own Kurdish minority population. Who's next?
